## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Group I (Claims 8-13), drawn to method of assembly of the apparatus, classified in class 29, subclass 888.01.
  - II. Group II (Claims 1-7), drawn to the apparatus, classified in class 123, subclass 90.38.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process of making or method of assembly and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the apparatus can be made or assembled by a different process, such as one that doesn't require assembling bushings.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
